

```
using Wisej.Hybrid;

public class MainPage : Wisej.Web.Page
{
    public MainPage()
    {
        // Subscribe to the device back button event
        Device.Current.BackButtonPressed += OnBackButtonPressed;
    }

    private void OnBackButtonPressed(object sender, EventArgs e)
    {
        // Custom behavior: prevent default navigation
        e.Handled = true;

        // Example: show a confirmation dialog
        Wisej.Web.MessageBox.Show("Do you really want to exit?");
    }
}
```
